

Summer Term

English

We will begin the half-term with the novel *Wonder*. We will explore the text in detail where we will discuss the characters, their feelings and actions and use this to write a story focusing on blending speech and action. We will then move on to biographies where we will investigate features and use examples to write our own biography.

Maths

Maths this half-term will be focused on reasoning, where we will build on our skills of fractions, area and perimeter, ratio and proportion and 3D shapes

Geography/ History

We will finish off our Extreme Earth unit where we have explored areas of extreme weather and then the rest of the academic year will be based around the Mayans. We will explore when and where in history they existed, we will explore their culture including language, homes, clothing and society

R.E.

In R.E. we will be exploring the Ascension and Pentecost where we will recall and revisit previous learning on the topic from previous year groups and then build on this to explore the impact it has on Christian values and beliefs today.

Science

We will be exploring light this half term where we will establish how light travels in straight lines. We will explore how we see things through light travelling from light sources to our eyes or from light sources to objects and then to our eyes. We will use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.
